PROFESSIONAL SUMMARY

Electrical & Electronics Engineering undergraduate and passionate data science student with a cross-disciplinary focus on Artificial Intelligence and Machine Learning. An avid, continuous learner experienced in building end-to-end predictive workflows spanning data analysis, visualization, model development, and deployment. Skilled in designing and training complex neural network architectures and implementing robust MLOps pipelines with an emphasis on production-grade coding standards, scalability, and reproducibility. Seeking an internship or full-time role to apply strong analytical and computational skills to build impactful, real-world AI solutions.

EDUCATION

Ramaiah Institute of Technology, Bengaluru

Sept 2023 – June 2027

B.E. in Electrical & Electronics Engineering

Relevant Coursework: Machine Learning, DBMS, Data Structures & Algorithms, Operating Systems, OOP, Digital Electronics, Cyber Security

Sri Agrasen School, Ramgarh, Jharkhand

2022

Class XII (CBSE) — 80.6%

DAV Public School, Patratu, Jharkhand

2020

Class X (CBSE) — 93.4%

PROJECTS

End-to-End Customer Churn Prediction | Python, TensorFlow, Scikit-learn, Streamlit

2025

- Designed and trained a Deep Neural Network (DNN) achieving 80% Recall, optimised to minimise false negatives and reduce revenue loss from missed churners.
- Built a production-grade MLOps pipeline with modular coding standards, custom logging, and Scikit-learn pipelines to eliminate training-serving skew.
- Deployed the model as a live Streamlit web application for real-time customer risk assessment, targeting high-risk segments such as month-to-month subscribers.
- Applied feature engineering and hyperparameter tuning across batch-normalised layers; evaluated trade-offs using precision-recall curves.

SKILLS

Languages: Python, C, C++

ML / DL: TensorFlow, Scikit-learn, Hugging Face Transformers

Data Analytics: NumPy, Pandas

Data Visualisation: Matplotlib, Seaborn

Numerical Computing and Simulation: MATLAB, Scilab

MLOps & Deployment: Streamlit, Modular Pipelines, Custom Logging

Databases: SQL, MySQL

Version Control: Git, GitHub

AI Ecosystem: Claude, Gemini, ChatGPT, DeepSeek, LLaMA, Qwen

CERTIFICATIONS

Machine Learning Specialisation | DeepLearning.AI / Coursera — Andrew Ng

2025

Neural Networks & Deep Learning | DeepLearning.AI / Coursera — Andrew Ng

2025

ACHIEVEMENTS & EXTRACURRICULARS

- Actively experiments with open-source LLMs (LLaMA, Qwen, DeepSeek) for local deployment and prompt engineering, staying current with the rapidly evolving AI ecosystem.
- EEE undergraduate at RIT Bengaluru — bridges hardware systems knowledge with applied ML, offering a cross-disciplinary perspective suited to embedded AI and edge deployment roles.
